Summary

Java Full-Stack Developer with hands-on experience in Spring Boot, React.js, and MySQL. Skilled in building REST APIs, responsive web applications, and database-driven systems. Passionate about developing secure, scalable, and efficient software solutions with a focus on clean architecture and real-world impact.

Experience

Java Full-Stack Developer Intern

Feb 2026 – Present

Tap Academy

Bangalore, Karnataka

- Developing full-stack web applications using Java, Spring Boot, React.js, and MySQL in an agile team environment.
- Building secure backend services and RESTful APIs with role-based JWT authentication for multiple application modules.
- Creating responsive user interfaces using React.js, HTML, and CSS, ensuring cross-browser compatibility.
- Designing and managing MySQL databases with optimized schema design and complex queries handling 1000+ records.
- Using Git and GitHub for version control, collaboration, and maintaining code quality across team branches.

Projects

NeuroCart | Java, Spring Boot, React.js, MySQL, JWT, REST APIs, Git | [Project Link](#)

Feb 2026

- Developed a full-stack e-commerce web application supporting product browsing, cart management, and secure checkout.
- Implemented secure REST APIs with JWT authentication for user login, session management, and role-based access control.
- Designed a normalized MySQL schema with 8+ tables and integrated a responsive React.js frontend with Spring Boot backend.
- Managed source control and team collaboration using Git and GitHub with feature-branch workflow.

Autonomous Research Agent | React.js, Spring Boot, MySQL, Groq API, Tavily API, SSE | [Project Link](#)

Mar 2026

- Built a full-stack AI research agent that autonomously searches the web, analyzes articles, and generates structured research reports with citations.
- Integrated Groq Llama 3.3 70B for AI-powered report generation and Tavily Search API for real-time multi-source web search across 10+ sources per query.
- Implemented real-time agent step streaming using Server-Sent Events (SSE) to push live updates from the Spring Boot backend to a React dashboard.
- Designed relational MySQL tables using Spring Data JPA and Hibernate ORM to store research sessions, search results, agent steps, reports, and citations.

Blood Donation Management System | PHP, HTML, CSS, MySQL, XAMPP | [Project Link](#)

Aug 2025 – Sep 2025

- Developed a web application using PHP, HTML, and CSS to manage blood donor information and connect donors with recipients.
- Implemented a MySQL database to manage donor registration details, contact information, and blood groups for 500+ records.
- Configured XAMPP local server environment for full-cycle development and testing of the application.

Technical Skills

Languages: Java, Python, JavaScript, PHP

Frontend: React.js, HTML5, CSS3, TailwindCSS

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication, Server-Sent Events

Databases: MySQL, MongoDB, JDBC, Spring Data JPA, Hibernate ORM

Tools & Platforms: Git, GitHub, Postman, IntelliJ IDEA, VS Code, XAMPP, Maven

Core Concepts: Object-Oriented Programming (OOP), Data Structures, REST Architecture, Problem Solving

Education

Yenepoya Institute of Technology

Bachelor of Engineering in Computer Science

2022 – 2026

CGPA: 8.55 / 10.0

S.D.P.T P U College, Udupi

Pre-University (PCMB)

2020 – 2022

Percentage: 83.33%
